

FOR IMMEDIATE RELEASE

Contact: Douglas L. Reilly, VP Business Development

October 1, 2009

The Bosworth Company is pleased to announce the availability of a new series of updated Product Specification Sheets for its line of pump and valve offerings. The spec sheets are available for download at www.thebosworthco.com. The new product spec sheets provide more detailed information on performance and dimensional characteristics, as well as important product configuration information.

A new feature of the spec sheets is a product nomenclature guide. This guide provides an easy-to-use way of composing a product part number that uniquely identifies a particular product configuration, as determined by the product feature options chosen. Customers can use this part-specific model number to inquire on product pricing and availability.

Kenneth Bosworth, President of The Bosworth Company, states, “We believe our new spec sheets will provide very useful information to our customers. Our new specification sheets complement our recently released Product Catalog, providing the kind of detailed product information that will enable customers to determine which product best suits their application and how to configure it for their needs.”

The Bosworth Company, located in East Providence, Rhode Island, was founded in 1982 by Kenneth Bosworth. The Bosworth Company offers a wide range of diaphragm pumps, valves and pump accessories to meet a variety of fluid transfer needs. The Bosworth Company is certified under ISO-9001.
